

3rd European meeting of EHESP School of Public Health

AMSTERDAM

10 NOVEMBER 2010

LIMITATIONS, DISABILITIES AND DEPENDENCY: HOW TO MEASURE, HOW TO TRAIN?

How European countries organize themselves to help the most vulnerable of their citizens to avoid them to be trapped into the social and medical disability ? How to measure limitations, disabilities and dependency ? How do recent public policy trends, NGO Initiatives and advances in disability research impact on disability studies training programs and the life of people with disabilities ?

The EHESP School of Public Health is organizing a meeting of reflection and discussion on this topic. Open to health professionals, deciders, and citizens organizations, this one-day meeting will take place in Amsterdam, on November 10th, 2010, from 8.30 am to 4 pm. The event will be held in English at the opening of the third European Public Health Conference, and will contrast and compare the different view-

points of European and North American researchers and trainers.

Within the framework of the European Year for Combating Poverty, a first meeting will be held on the theme "Public health, poverty and disability", on September 28th, 2010, from 9 am to 5 pm at UNESCO in Paris

 Registration on :
